# Buddha seeds

**Classics Buddha Seeds** is the new family of **legendary cannabis strains** that, with the special magic that characterizes the Spanish Seed Bank, joins the brand's catalog. This **collection of 6 varieties** is available in **autoflowering and non-autoflowering version**.

**Buddha Diesel, Buddha Critical, Buddha Amnesia, Buddha Ak, Buddha Skunk and Buddha White Widow** are the new members of a large family who will give a lot to talk about in the cannabis scene, as the originals did, long time ago.

The team of **breeders at Buddha Seeds** has managed to maintain the essence and main qualities of these legendary varieties, with the Buddha Seeds seal of quality and innovation.

Since its inception, this classic has **continued to gain popularity from the public**. To this day, it continues to add followers. The history of this classic was developed, with the clear intention to earn its place in the Olympus of cannabis legends.

This variety dates back to the 70s, when its incredible power set a **benchmark** into the cannabis industry; very few crosses, to this day, have managed to equal and or even less, exceed it. The name of this classic erroneously leads non-expert growers to believe that it refers to the weapon of war. When really, its **origin is from one of its parents, a pure Afghan Kush**.

In the 1970s it was still relatively easy to find pure strains for passionate travelers who enthusiastically collected them from remote locations all around the globe. Something that today, it is very difficult to find.

The **original parents**, although it is difficult to ensure 100%, are made of pure sativas from Colombia, Mexico, Thailand and Afghanistan. These varieties were for years crossed and tamed by expert growers so that finally, in the 90s, this classic saw the light. This incredible hybrid, with a slight sativa dominance, already adapted

to indoor and outdoor crops, continues to fascinate any grower.

This variety has played a transcendental role in cannabis breeding, starring, for many years in a large part of the crosses of new generations. And no wonder: it has achieved, alone, more than twenty titles in highly recognized cannabis cups. **From Buddha Seeds we have included**, in the selection of classics, the most faithful version to the original.

**Our selection comes from ancient cuttings** kept for over 20 years that still maintain incredible vigor. **Buddha AK**, it cannot be otherwise, has been developed by our breeders to make it even more resistant and easy to grow.

**Buddha Ak has a more compact size and it is easy to grow**. We have eliminated the excessive, uncontrolled growth of its sativa parents as much as possible, maintaining its essence, production and power in much more compact voluminous branches that surprise even experts. On the other hand, **Buddha AK is chosen among the specimens** with the highest concentrations of **THC**; this will make you understand why this classic continues to fill cabinets and its smoke will satisfy even to the most demanding consumers.

#### NOTE

When we talk about indoor productions (m2) the crops have been made in 11-liter pots. Meanwhile, when we say outdoors, we refer to crops in ground.

### BUDDHA AK CHARACTERISTICS

<b>Environment:</b>	Indoor/Outdoor
<b>Sex:</b>	Feminized
<b>Genetics:</b>	Sativa-dominant hybrid
<b>Flowering time indoor:</b>	60-63 days
<b>Harvest month outdoors:</b>	Second half of October (northern hemisphere) / Second half of April (southern hemisphere)
<b>Production m²:</b>	500-550g
<b>Outdoor production per plant:</b>	500g-2000g
<b>Taste:</b>	Phenotypes between fruity and citrus. With an earthy base.
<b>Effect:</b>	Energetic for your gray days. It stands out for the long-lasting cerebral high without the effect of body heaviness. It triggers good vibes. Perfect for consumption with others.

### BUDDHA AUTO AK CHARACTERISTICS

<b>Environment:</b>	Indoor/Outdoor
<b>Sex:</b>	Feminized
<b>Genetics:</b>	Sativa-dominant hybrid
<b>Cultivation time (growth + flowering)</b>	70 days
<b>Production m²:</b>	400-550g
<b>Outdoor production per plant:</b>	60g-100g
<b>Taste:</b>	Phenotypes between fruity and citrus. With an earthy base.
<b>Effect:</b>	Energetic for your gray days. It stands out for the long-lasting cerebral high without the effect of body heaviness. It triggers good vibes. Perfect for consumption with others.

**Amnesia rose to fame in a short time** with compelling arguments, which allowed it to gain the trust of the consumer. Such popularity catapulted the seeds across West Coast of the United States to the Mecca of marijuana in Europe: Amsterdam, where it continues to have a prominent place in the menu of coffeeshops.

The **reputation of this classic** has been forged, mainly, by the effect that its use produces. **Stimulating variety:** because of higher sativa load in its genetics. **Creative:** because it allows the consumer to open their mind to new ideas and / or projects. **Medicinal:** because it significantly reduces anxiety and stress. **Sociable:** because it favors human relationship.

We have included all of these characteristics in **Buddha Amnesia** as a tribute to this charming classic. We recommend in indoor crops not to give it more than two weeks of growth, for its sativa gene, or choose pruning and/or other **cultivation techniques such as Scrog or LST**.

With regard to flavors and aromas, its **incredible incense stands out significantly**. As if you are in a cathedral, this variety will fill the room and your senses with its aroma.

This characteristic effect that distinguish this classic, is widely used by painters, musicians and artists for those moments when a spark of creativity is needed. Of course recreational smokers appreciate it, and its ability to easily provoke laughter also. In addition, it can reach high percentages of THC.

Phenotypes with citrus touches stand out, from which the Amnesia Lemon lines and others with subtle notes of wood come out. The flavor lingers in the mouth long after each puff, being enjoyed at each expiration for minutes. **Haze characteristic**, such as its richness in terpenes, places it among the favorites for culinary recipes.

#### NOTE

When we talk about indoor productions (m2) the crops have been made in 11-liter pots. Meanwhile, when we say outdoors, we refer to crops in ground.

#### BUDDHA AMNESIA CHARACTERISTICS

<b>Environment:</b>	Indoor/Outdoor
<b>Sex:</b>	Feminized
<b>Genetics:</b>	Sativa-dominant hybrid
<b>Flowering time indoor:</b>	70 days
<b>Harvest month outdoors:</b>	Second half of October (northern hemisphere) / Second half of April (southern hemisphere)
<b>Production m²:</b>	500-650g
<b>Outdoor production per plant:</b>	500g-2000g
<b>Taste:</b>	Phenotypes with citrus touches and others with wood nuances standing out. The taste lingers in the mouth for a long time. Haze characteristic, such as its richness in terpenes, places it among the favorites for culinary recipes.
<b>Effect:</b>	Stimulating, creative, sociable, in addition significantly reducing anxiety and stress.

#### BUDDHA AUTO AMNESIA CHARACTERISTICS

<b>Environment:</b>	Indoor/Outdoor
<b>Sex:</b>	Feminized
<b>Genetics:</b>	Sativa-dominant hybrid
<b>Cultivation time (growth + flowering)</b>	70-75 days
<b>Production m²:</b>	380-500g
<b>Outdoor production per plant:</b>	70g-130g
<b>Taste:</b>	Phenotypes with citrus touches and others with wood nuances standing out. The taste lingers in the mouth for a long time. Haze characteristic, such as its richness in terpenes, places it among the favorites for culinary recipes.
<b>Effect:</b>	Stimulating, creative, sociable, in addition significantly reducing anxiety and stress.

Critical's story is reminiscent to a historical tale of great kings. And it's no wonder! Its genetics has ascendants of great value who have influenced later commercial varieties.

**Critical has gained the trust** of all growers since it was launched on the market in the 90's. It was crowned, in a short period of time, for **being one of the most frequent ordered**, in the coffeshops of Holland. Among the growers, for its high performance in cultivation. **Daughter of a Skunk and an Afghana**, she took her parents' throne as one of the most cultivated varieties today.

**Buddha Critical is a tribute to this cannabis classic**, but with our particular touch. **Buddha Seeds** has respected the originality of this variety, maintaining the outstanding characteristics for the recent grower.

The **main attraction of Buddha Critical** is its short flowering period, ideal for outdoor crops where it is preferable to harvest beforehand due to the weather. **Genetically selected in a climate not very grateful** for cannabis such as the Basque Country (Northern Spain), it stood out from the beginning for its

flavor, the incredible speed, and the production. In milder climates, these benefits are even stronger.

**Buddha Critical maintains the characteristics of Skunk** flavor, with more floral and sweet nuances, but not as sour as its parents. The **phenotypes stand out with fruity touches**, notes of honeydew. For all of this attributes it has become a strain that is liked by 100% of the smokers.

The care that **Buddha Critical by Buddha Seeds** needs are scarce, since it responds effectively to different treatments, resulting in a high-yield harvest with captivating aromas.

#### NOTE

When we talk about indoor productions (m2) the crops have been made in 11-liter pots. Meanwhile, when we say outdoors, we refer to crops in ground.

### BUDDHA CRITICAL CHARACTERISTICS

<b>Environment:</b>	Indoor/Outdoor
<b>Sex:</b>	Feminized
<b>Genetics:</b>	Indica-dominant hybrid
<b>Flowering time indoor:</b>	50-55 days
<b>Harvest month outdoors:</b>	Second half of September (northern hemisphere) / Second half of March (southern hemisphere)
<b>Production m²:</b>	500-650g
<b>Outdoor production per plant:</b>	600g-2000g
<b>Taste:</b>	Base of Skunk with floral and sweet undertones, not as sour as its parents. The phenotypes stand out with fruity touches, notes of honeydew.
<b>Effect:</b>	Balanced with a powerful initial cerebral high, accompanied by a feeling of well-being that culminates in a state of relaxation. Optimal for stress. Even if you decide to go for a mature crop, its narcotic effect is suitable for cases of insomnia.

### BUDDHA AUTO CRITICAL CHARACTERISTICS

<b>Environment:</b>	Indoor/Outdoor
<b>Sex:</b>	Feminized
<b>Genetics:</b>	Indica-dominant hybrid
<b>Cultivation time (growth + flowering)</b>	60-65 days
<b>Production m²:</b>	500-550g
<b>Outdoor production per plant:</b>	60g-120g
<b>Taste:</b>	Base of Skunk with floral and sweet undertones, not as sour as its parents. The phenotypes stand out with fruity touches, notes of honeydew.
<b>Effect:</b>	Balanced with a powerful initial cerebral high, accompanied by a feeling of well-being that culminates in a state of relaxation. Optimal for stress. Even if you decide to go for a mature crop, its narcotic effect is suitable for cases of insomnia.

An **essential modern classic** that set a benchmark in the flavors of cannabis. The mystery surrounding Diesel's origins remains unsolved among the most experienced growers, fulfilling the charm of a fascinating story. However, all the stories converge on the same person: **Chemdog, author of this classic.**

We have to go back to the 90s in the USA to locate the origin of this **globalized variety**. Chemdog bought some cannabis flowers, at a Grateful Dead concert, in which he found a few seeds that eventually became the origin of what is now Diesel. Over the years, it has **become a standard variety among growers**, and there are already countless cups won in competitions all around the world.

Therefore, from Buddha Seeds we have not hesitated to include it in our catalog of classics. Of course, always with the care that differentiates us, **with the Buddha Seeds quality seal.**

As a result of our breeding program, with **Buddha Diesel by Buddha Seeds** we have increased and **stabilized production to unsuspected** limits in a variety that lacked it. At the same time we wanted, and we managed, to keep the phenotype variation

with lots of nuances in the flavors that defines it and for which it has been used in thousands of development programs.

Even with a common background that characterizes it, we have allowed to produce phenotypes with notes from citrus lemon or grapefruit type, even earthy touches. **Buddha Diesel** maintains **that mantle of resin** that is so unique and that is makes it perfect for extractions.

**Buddha Diesel by Buddha Seeds** is suitable for anyone; it does not require much care, and is addressed to those who have less knowledge about the cultivation of the plant. In addition, it adapts well to **adverse weather situations.**

In summary, the parents of this classic **by Buddha Seeds** make it a really attractive plant, with productive results, especially in outdoor crops, with aromas and flavors attractive to the most demanding consumer. **A delight that cannot be missing in your garden!**

#### NOTE

When we talk about indoor productions (m2) the crops have been made in 11-liter pots. Meanwhile, when we say outdoors, we refer to crops in ground.

#### BUDDHA DIESEL CHARACTERISTICS

<b>Environment:</b>	Indoor/Outdoor
<b>Sex:</b>	Feminized
<b>Genetics:</b>	Sativa-dominant hybrid
<b>Flowering time indoor:</b>	65-70 days
<b>Harvest month outdoors:</b>	Second half of October (northern hemisphere) / Second half of April (southern hemisphere)
<b>Production m²:</b>	400-550g
<b>Outdoor production per plant:</b>	500g-1500g
<b>Taste:</b>	Phenotypes variation with lots of nuances in flavors. Notes from citrus like lemon or grapefruit, to earthy touches.
<b>Effect:</b>	Psychoactive, creative and sociable.

#### BUDDHA AUTO DIESEL CHARACTERISTICS

<b>Environment:</b>	Indoor/Outdoor
<b>Sex:</b>	Feminized
<b>Genetics:</b>	Sativa-dominant hybrid
<b>Cultivation time (growth + flowering)</b>	75 days
<b>Production m²:</b>	350-500g
<b>Outdoor production per plant:</b>	70g-130g
<b>Taste:</b>	Phenotypes variation with lots of nuances in flavors. Notes from citrus like lemon or grapefruit, to earthy touches.
<b>Effect:</b>	Psychoactive, creative and sociable.

Skunk is one of the most recognized hybrids by growers. This commercial fame has been earned, in part, by its correct nomenclature since **Skunk specimens exude a very characteristic sweet aroma.**

The **Skunk story** has enough material for a television series. One of the protagonists of the creation of this classic is the breeder Sam 'The Skunkman', who, with a group of partners, wrote the first lines of the legend.

The situation in the United States was delicate, as constant political pressure against drugs was common. Therefore, Skunk had to make the leap to the European continent, in search of an opportunity. And he did not lack time to find it, since it **was transferred to a prestigious Dutch seed bank.**

From **Buddha Seeds** we have not hesitated to include this variety in the collection of classics with our own touch, paying **tribute with Buddha Skunk.** Our team has managed to maximise the most attractive aspects that growers of this genetics like so much.

The **characteristics of Buddha Skunk** are summarized in; it is a predominantly sativa hybrid, with stable uniformity, **strong, powerful and productive.** The flowering time is short, especially considering the result of the final harvest. It is advisable to eliminate odors in indoor crops with anti-odor filters, since their presence is notorious.

Sativa genetics are evident in every **Buddha Skunk** individual. It stands out for its beautiful aspect, formed by **prominent calyxes and abundant pistils** that make up voluminous buds. The effect is of a true sativa: pure cerebral energy that will facilitate creativity, good social vibes and personal vitality.

Its flavor is indiscribable. We could say that it is **the flavor of marijuana par excellence!** Although it always maintains the same Skunk background, it has an incredible aromatic variation that ranges from fruity citrus to sour aromas.

#### NOTA

When we talk about indoor productions (m2) the crops have been made in 11-liter pots. Meanwhile, when we say outdoors, we refer to crops in ground.

### BUDDHA SKUNK CHARACTERISTICS

Environment:	Indoor/Outdoor
Sex:	Feminized
Genetics:	Sativa-dominant hybrid
Flowering time indoor:	65-70 days
Harvest month outdoors:	Second half of October (northern hemisphere) / Second half of April (southern hemisphere)
Production m²:	400-550g
Outdoor production per plant:	500g-1500g
Taste:	It always maintains the same Skunk background, it has an incredible aromatic variation that goes from fruity citrus to sour aromas.
Effect:	Brain energy that will promote creativity, good social vibes and vitality.

### BUDDHA AUTO SKUNK CHARACTERISTICS

Environment:	Indoor/Outdoor
Sex:	Feminized
Genetics:	Sativa-dominant hybrid
Cultivation time (growth + flowering)	75 days
Production m²:	450-550g
Outdoor production per plant:	80g-120g
Taste:	It always maintains the same Skunk background, it has an incredible aromatic variation that goes from fruity citrus to sour aromas.
Effect:	Brain energy that will promote creativity, good social vibes and vitality.

**White Widow** is a **legend and one** of the most acclaimed strains in the cannabis world, whose origins date back to the 90s. The sale of White Widow was a success in the year of its launch in the Netherlands and only a year later, it was already harvesting its first award, by winning the first prize in the High Times Cannabis Cup (1995).

The first development of **White Widow** was the combination of a pure sativa line with an indica hybrid, giving birth, probably, to one of the most widely planted commercial varieties in the world.

**Buddha Seeds** is highly aware of the importance of this variety, and for this reason, it is the undisputed holder in our selection of classics. We wanted to pay our most faithful tribute to this **cannabis queen with Buddha White Widow**, respecting the main qualities that keep it at the top.

**Buddha White Widow surprises for the rapid flowering, productivity and high resin concentration**, that can be reached in every plant. In addition, it is easy to grow with a singular narcotic effect. A wonderful plant that will catch your eye from the first moment!

The **name is related to its incredible power** that knocks down even the most experienced. **Buddha White Widow** is a high-flying strain that you hardly get used to.

With a **spicy flavor**, touches of pine resins and a bit of wood, its flavor is very complex and extremely intense. Although **we have stabilized its morphology** as much as possible, we left a slight variation in its aromatic phenotypes so that you can select the clone you like the most.

#### NOTE

When we talk about indoor productions (m2) the crops have been made in 11-liter pots. Meanwhile, when we say outdoors, we refer to crops in ground.

#### BUDDHA WHITE WIDOW CHARACTERISTICS

<b>Environment:</b>	Indoor/Outdoor
<b>Sex:</b>	Feminized
<b>Genetics:</b>	Indica-dominant hybrid
<b>Flowering time indoor:</b>	65-70 days
<b>Harvest month outdoors:</b>	Second half of October (northern hemisphere) / Second half of April (southern hemisphere)
<b>Production m²:</b>	500-650g
<b>Outdoor production per plant:</b>	500g-2000g
<b>Taste:</b>	Very complex and tremendously intense. Spicy flavor, touches of pine resins and a bit of wood.
<b>Effect:</b>	Powerful, relaxing and suitable for experienced users.
